

AGRIFACT

100% Active Liquid Super
Surfactant and Spreader Sticker

PRODUCT DATA BULLETIN

AGRIFACT is an exciting new generation blend of new SUPER SURFACTANTS based on **Organo-Modified Siloxane Technology**. This new technological advance allows this product to perform far beyond the capabilities of conventional surfactants and spreader stickers - in fact with as much as 25 times the efficacy. This new chemistry is so effective in wetting out hydrophobic surfaces that the resultant effect can only be likened to **Molecular Un-Zipping** with the zipper being pulled open in the presence of AGRIFACT SUPER SURFACTANT. This molecular unzipping effect ultimately shows itself by its enhanced ability to lower surface tension and contact angles of spray droplets.

POWER PACK HERBICIDES

Plant stomata are the microscopic pores in the leaf surface through which water, oxygen and CO₂ gain entry. With the addition of AGRIFACT, droplet size becomes ideal for rapid absorption by the plant stomata, and droplets are quickly translocated through the plant for more effective weed control.

SUPER CHARGED WETTING AGENT

AGRIFACT efficacy in herbicide enhancement can be utilized in non-chemical application wetting. Stomatal wetting ensures more even and effective wetting out of dry spots, allows for faster and deeper penetration into soil structure, and promotes larger, deeper and healthier root systems.

PRINCIPAL FUNCTIONING AGENTS

100% Active Proprietary Blend of Nonylphenol Oxyethylene and Siloxane (Silicone-Polyether Copolymer).

CONTAINER DISPOSAL

Triple rinse, then offer for reconditioning.

COMPATIBILITY

AGRIFACT may be used with most wettable powders, emulsifiable concentrates, or soluble formulations of most herbicides or pesticides currently on the market.

APPLICATION

FOR USE WITH HERBICIDES, FUNGICIDES AND INSECTICIDES

Add AGRIFACT to the spray tank at the rate of 4 to 6 ounces per 100 gallons of spray solution.

FOR USE AS A SOIL AND TURF WETTER

Greens and Tees

Apply early in the season to improve water penetration, absorption and retention at the rate of 8 to 12 ounces of AGRIFACT per acre. Apply in minimum of 50 gallons of water per acre. May reapply at 2 week intervals during the warm weather months.

Fairway and Athletic Fields

Apply at the rate of 16 to 24 ounces per acre in a minimum of 50 gallons of water per acre.

CAUTION

KEEP OUT OF REACH OF CHILDREN

Avoid contact with skin, eyes and clothing. Keep from open flame or sparks. Do not get in eyes. In case of ingestion or eye contact, flush with plenty of water and get medical attention. May be harmful if swallowed.
