

Arch Series 6500

Quality....

- Superior strength rollformed Gothic arches and rollformed purlins insure unmatched structural integrity.
- Each arch assembly is produced from one rollformed component—no splices required from peak to gutter connection.
- Condensate control features built into rollformed arches and purlins.

Reliability...

- Some 50 years of experience go into each Arch Series 6500 fabricated.
- Every detail has been field tested and refined to guarantee complete customer satisfaction.

Value....

- Components are shipped pre-punched and cut to length simplifying the installation.
- Rollformed components nest one onto the other, during shipment, substantially reducing freight rates.

Flexibility....

- The Arch Series 6500 Series is equally at home as a growing area or sophisticated garden center.
- Can be covered with polyethylene or rigid coverings including polycarbonates.
- Available in 10 lb., 20 lb., or 30 lb. Snow loads. Certified to meet Uniform Building Codes (UBC).

One of the true industry workhorses, the Arch Series 6500 design can be found throughout the country and world in some of the harshest environmental conditions known. The unique Gothic arch is functional at both shedding snow and combating overhead drip.
