

Ranger Series 2000

Quality....

- Superior strength rollformed arches, legs, and purlins insure unmatched structural integrity.
- The proven Gothic Arch design is engineered to reduce roof snow build-up and provide maximum headroom.

Flexibility....

- The Ranger Series 2000 is equally at home as a growing area or sophisticated garden center.
- Can be covered with polyethylene, shade cloth, or rigid coverings including polycarbonates.
- Available in 10 lb., 20 lb., or 30 lb. Snow loads.

Whether starting out or in an expansion mode, the versatility of the Ranger Series 2000 offers a natural no nonsense solution for obtaining maximum productivity while reducing capital investments.

Value....

- Rollformed components require substantially less labor to manufacture than conventional greenhouse designs.
- Components are shipped pre-punched and cut to length simplifying the installation.
- Rollformed components nest one onto the other, during shipment, substantially reducing freight rates.

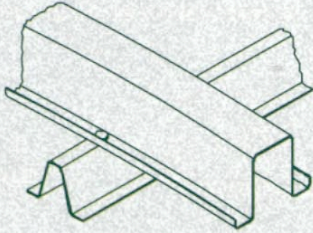

Reliability...

- Some 50 years of experience go into each Ranger Series 2000 fabricated.
- Every detail has been field tested and refined to guarantee complete customer satisfaction.

Ranger Series 2000

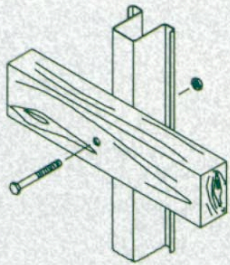

Arch and purlin design offer "I" beam technology for superior strength.

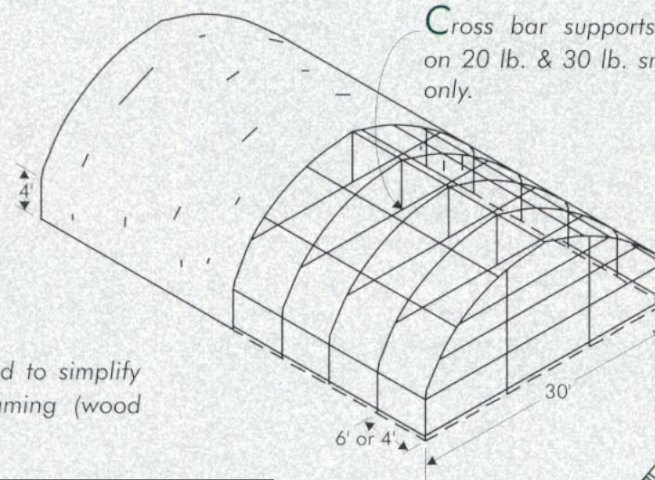

Aluminum end wall combination creates a flashing for end wall and roof coverings.

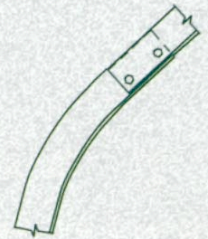

Tube Lock II is the most efficient means of securing poly coverings.

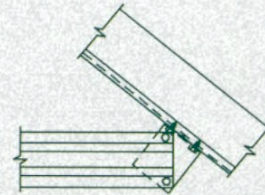

All legs are shipped pre-punched to simplify the installation of side wall framing (wood supplied by others).

Cross bar supports supplied on 20 lb. & 30 lb. snow loads only.

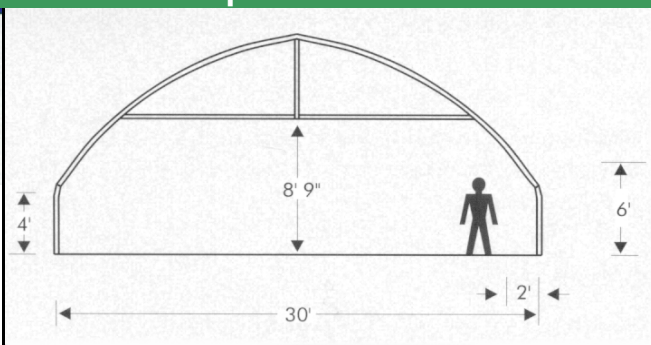

13 gauge rollformed legs are stronger than conventional greenhouse columns.

Galvanized steel end wall kits incorporate rollformed components for added strength.

Specifications
