

Gemini™

3.7 SC

LIQUID PRE-EMERGENT HERBICIDE

Two trusted actives in a convenient, pre-mixed formulation.

Gemini™ 3.7 SC is a liquid, pre-emergent herbicide featuring a selective combination of two active ingredients: Prodiamine and Isoxaben (*the same actives found in Barricade® and Gallery®*)*. This convenient, new formulation delivers broad-spectrum control to prevent the emergence of even the most troublesome broadleaf and grassy weeds.

Advantages:

Control: Suspended concentrate creates a uniform and prolonged herbicide barrier; greatly decreases the potential risk of profit-robbing weed breakthroughs

Versatility: Can be applied over the top of many crops, including shrubs and perennials

Economy: Convenient pre-mixed formulation:

- Time and labor savings
- Only one product to buy and inventory
- Competitive cost in use per acre compared to tank mix

Flexibility: Can be applied in the spring or fall for season-long control of weeds**

Safety: Low potential phytotoxicity; good crop tolerance

Weeds Controlled:

The dual efficacy of Gemini's formulation controls or suppresses more than 125 broadleaf and annual grasses, including:

Annual Bluegrass	Goosegrass
Bittercress	Groundsel
Chickweed	Henbit
Crabgrass	Oxalis
Foxtail	Spurge

EPA REGISTRATION NO.
53883-325-58185

ACTIVE INGREDIENTS

Prodiamine – 23.3%
Isoxaben – 15.5%
(compare to tank mix of Barricade® & Gallery®)

CHEMICAL FAMILY

Prodiamine: Dinitroaniline (Group 3)
Isoxaben: Benzamide (Group 21)

FORMULATION

3.7 SC (Suspended Concentrate)

USE SITES

Ornamental field and container nurseries; Christmas tree farms

MODE OF ACTION

Prodiamine: Inhibits microtubule assembly during cell division
Isoxaben: Disrupts cell wall development

APPLICATION RATES

1 fl oz/1000 sq ft or 43.5 fl oz/acre
2 fl oz/1000 sq ft or 87 fl oz/acre

RESTRICTED USE

NO

SIGNAL WORD

Caution

PACKAGING

2.5 gal (9.46 L)

*Barricade® is a trademark of a Syngenta Finance Corporation. Gallery® is a trademark of Dow AgroSciences LLC.

**Length of control will vary by climate and application rate. See product label for specific rates and weeds controlled.

Gemini™

3.7 SC
LIQUID PRE-EMERGENT HERBICIDE

FORMULATION:

Gemini 3.7 SC liquid herbicide contains the active ingredients *Prodiamine* and *Isoxaben*. Each gallon contains 3.7 pounds of active ingredient: (2.2 pounds *Prodiamine* per gallon + 1.5 pounds *Isoxaben* per gallon).

ALWAYS READ AND FOLLOW LABEL DIRECTIONS BEFORE USING THIS PRODUCT.

MODE OF ACTION:

The active ingredients within the suspended concentrate inhibit mitotic processes in plants and control susceptible weeds by preventing the growth and development of newly germinated weeds. **Note:** Weed control is most effective when Gemini is activated by at least 0.5 inches of rainfall or irrigation or shallow incorporation (1 to 2 inches for non-turf applications) before weed seeds germinate, and within 14 days following application.

LABELED USES:

Apply Gemini 3.7 SC for pre-emergence control of more than 125 grass and broadleaf weeds in the following areas:

- Container and field-grown ornamentals
- Christmas tree farms
- Noncropland Areas: bareground for container placement

APPLICATION:

Apply Gemini 3.7 SC in a minimum of 20 gallons/acre (0.5 gallons /1,000 sq ft) of carrier (water) using an accurately calibrated, low-pressure sprayer with 50-mesh or coarser screens.

STATE RESTRICTIONS:

- Not for sale, use or distribution in the states of New York and Arizona.
- Not yet registered for sale, use or distribution in the state of California.

Consult with an Everris® Territory Manager or visit www.everris.us.com for more detailed information about the advantages of incorporating Gemini into your existing herbicide program.
